

FAUCET

For the best tasting sake on tap, we recommend a 304-grade stainless steel flow control faucet.

SHANK

Use 304-grade stainless steel for any parts that come in contact with the sake.

BEVERAGE GRADE LINES

Use only wine-grade, non-oxidizing "flavorlock" tubing.

COUPLER

Free Flow stainless steel wine kegs require a 304-grade coupler to attach the keg to the line.

ADDITIONAL EQUIPMENT

TAP TOWER

An additional tap tower may be required when installing a new direct draw system.

GAS & REGULATOR

Use Beverage Grade CO2 gas only. In some instances, an inline gas regulator may be recommended.
