2 temperature controlled compartments  
(each hold 4 x 1/6 kegs)

Approx. Dimensions: 59.5"W x 28.25"D x 37.25"H

Exterior Options: Black

## 1-4 Tap Bartop Dispenser

1-4 temperature controlled lines carry wines from  
keg to taps

Approx. Dimensions: 7"W x 17"D x 15"H

## RETROFIT YOUR BEER LINES FOR PREMIUM WINE ON TAP!

A beer draft system can be modified for a consistent premium wine on tap pour every single time.

For an existing direct draw system retrofit, all you need is:

1. Wine-certified Hardware, NO BEER PARTS! Any metal that touches wine needs an upgrade to 304 grade stainless steel (this includes your tower, faucets and couplers)
2. Wine Grade Tubing to prevent oxygen leaks, flavor transfer and off tastes. Lines and hardware need to be cleaned quarterly, or when a keg is changed or replaced.
3. A blend of 75% Nitrogen and 25% CO2 (AKA Guinness Gas or BevGas) should be used. For direct draw, a pressure setting of 4-7 PSI is all that's needed.
